

Amendments to the Detailed Description:

Please replace the paragraph beginning with “The intended operation of this device”, with the following new paragraph:

The intended operation of this device is as follows: First, insert the bottom of the rod portion 2 into the rod holder 6. Second, turn the rod portion 2 so that the angle of the rod holder 6 is in line with the adjustable angle of the cup portion 1 , this will allow the orienting slots 9 at the bottom of the rod portion 2 to align with the orienting pin 8 of the rod holder 6. Third, slide the remaining rod portion 2 into the rod holder 6 until the orienting slots 9 seat securely onto the orienting pin 8 of the rod holder 6. Forth, adjust the cup portion 1 to the desired angle (usually vertical). Fifth, tighten the wing nut 3 to secure the assembly.
